

21. MORE INFORMATION ABOUT THE STRUCTURE

Goals

- Add one more file in our repository

Adding index.html

Let us add an `index.html` file to the repository. The following file is perfect for this purpose.

FILE: *INDEX.HTML*

```
<html>
  <body>
    <iframe src="lib/hello.html" width="200" height="200" />
  </body>
</html>
```

Add the file and make a commit.

RUN:

```
git add index.html
git commit -m "Added index.html."
```

Now when you open `index.html`, you should see a part of the hello page in a small window.

We plan to roll-out a major upgrade to this tutorial pretty soon. We can keep you posted if you want.
