GIT *HowTo*

English

44. PULLING AND MERGING CHANGES

Goals

- To learn that `git pull` command is identical to `git fetch` plus `git merge`.

Discussion

We are not going to run through the entire process of making and pulling a new change, but we want you to know that:

```
git pull
```

is actually equivalent to the following two steps:

```
git fetch
git merge origin/master
```

‹ 43. Merging pulled changes

45. Adding a tracking branch ›

We plan to roll-out a major upgrade to this tutorial pretty soon. We can keep you posted if you want.
