

49. REMOVING COMMON CHANGES

Goals

- To learn how to extract changes from the common repository.

Quickly switch to the cloned repository and extract the changes, just sent in a common repository.

RUN:

```
cd ../cloned_hello
```

Note: We are now in the *cloned_hello* repository.

Continue with ...

RUN:

```
git remote add shared ../hello.git
git branch --track shared master
git pull
cat README
```

◀ 48. Submitting changes

50. Placing your git repository ▶

We plan to roll-out a major upgrade to this tutorial pretty soon. We can keep you posted if you want.
